

a new WG

ICT for Clean Mobility

Co-Chaired by
ACEA, ERTICO

What should the WG investigate?

Potential contributions of information and communication technology for

the reduction of CO₂ and other emissions in a combined effort of Industry, Users, Public Authorities and Infrastructure Operators

Areas of Activity

- ICT to support the *quality and efficiency of infrastructure*
- Develop *educational tools* for encouraging Eco-Driving
- Providing input on traffic conditions topography and air quality to *vehicle power train, energy management* and *emission control* systems
- *Cost benefit analyses* of applying ICT based solutions and education for environmental benefits

Next steps

- finalize terms of reference & group membership
- endorsement by the eSafety SG on 4th July
- report to the next forum
