

## Invitation

The SafetyNet Project is organising a high level Conference, which is to take place 10 – 11 May 2006 in the beautiful city of Prague.

The purpose of this Conference is to bring together road and vehicle policy making and accident data needs.

Speakers at the Conference will come from diverse backgrounds but all share a common goal, which is the desire to improve road and vehicle safety. Speakers will include representatives from the EU Commission, Government Ministers, NGO's, vehicle manufacturing industry, public health and law enforcement.

The Conference will be of special interest to all those occupied in the field of road and vehicle safety but more especially those working at the level of policy making, day to day practitioners and researchers, employed in the following areas:

- Road and Vehicle Safety Policy
- Automotive Safety
- Infrastructure Safety
- Enforcement
- Public health
- Trauma management
- Roads Policing
- Research

Day two of the Conference will be SafetyNet focused, with presentations and some practical demonstrations from the seven Work Packages contained within the project.

Translation services will be available for both days of the Conference.

The first announcement for the Conference can be found at <http://safety.net/swov.nl/>

The detailed programme including the registration form, will be available in early January 2006 but please make a date in your diary now to attend this prestigious Conference.

To register an interest in attending please contact us at [safety.net@lboro.ac.uk](mailto:safety.net@lboro.ac.uk)
