European Road Transport Research Conference

Göteborg, Sweden, 12 -15 th of June, 2006

Main theme

- *Implementing the European Research Area (ERA) on Road Transport.*

Objective

- *To establish an event for the alignment of the road transport research and development stakeholders, contributing to a European Research Area (ERA) on road transport. This will contribute to a more competitive, sustainable, safer and efficient road transport system.*

Mission

- *To support the alignment of European, national, regional and private research and development actions on road transport by enhancing the networking and clustering of Europe's research and development capacity based on a shared Strategic Research Agenda (SRA).*

Scope

- *All aspects of road transport research will be covered.*
