

# ETSI (European Telecommunications Standards Institute)

- Open forum with about 650 members from 59 countries
- Mission: Determine and produce telecommunications standards
- Officially responsible **European standardization of ICT**
  - telecommunications, broadcasting and related areas such as intelligent transportation and medical electronics
- Agreement on cooperation of ETSI with CEN and CENELEC
- ETSI produces voluntary standards - some of these may go on to be adopted by the EU as the technical **base for Directives or Regulations**
- EU policy makers issue mandates aiming at the production of specifications
  - => European standards organizations are consulted
- Different types of ETSI deliverables:
  - Technical Reports (TR)
  - ETSI Standard (ES) - voted only by ETSI members
  - European Standard (EN) - voted by national delegations

# ETSI TC ITS

- organisation

In cooperation with TC LI

- Network Security
- User Security
- National Security
- Lawful Intercept
- Privacy

# ETSI TC ITS

- Key fields of interest
  - Standards development
  - Test Specification development for conformance testing to standards and for interoperability
  - Interoperability test events, Plugtests
  - Support services and Training to standards for related sector organizations
